Comments

1. wet sliced.
2. flat facet on right side edge, 3mm across. Straight + regular, but one edge of the facet is particularly distinct, giving a pointed edge impression.
3. hafting stain on back face: contact area is a darker green than rest of celt. Not very distinct. On front face, part of a boundary can be made out: darker above, lighter brown below.
4. blade edge fresh but not sharp.
